His Honour the Honourable the Lieutenant Governor entered the Assembly and took his seat on the Throne.

His Honour then read the following Speech from the Throne:

SPEECH FROM THE THRONE

MR. SPEAKER AND MEMBERS OF THE LEGISLATIVE ASSEMBLY:

It is with much pleasure that I welcome you to this Fourth Session of the Eleventh Legislature of the Province of Alberta.

Since the occasion of your last session, this Assembly has suffered the loss of a faithful and conscientious member in the passing of Norman E. Cook, representative for the Olds Constituency. Mr. Cook's kindly personality and sincerity of purpose won the confidence and respect of all who knew him and in his passing this Province has lost a valued public servant.

During the past year, the situation resulting from a continued deterioration of international relationships has made it increasingly necessary for freedom-loving peoples to be prepared to defend themselves from the menace of totalitarian aggression. The need for preparedness is such that for the first time in the history of our Province this Assembly must extend its deliberations to include matters relative to the defence and security of our civilian population. In co-operation with the Federal and Municipal authorities, my Government has prepared plans for the establishment of a practical and efficient organization for civilian defence and you will be asked to approve legislation to enable these plans to be put into effective operation in the event of an emergency.

In marked contrast to the confused world situation has been the orderly progress and general well being that has prevailed in our Province. Extensive development of our natural resources has continued throughout the year and the far reaching beneficial effects have brought a large measure of satisfaction to our people.

My Government is confident that its policy of encouraging the orderly development of our oil resources through competitive individual enterprise will ensure continued large-scale operations during the ensuing year, bringing to the Provincial Treasury substantial revenues which will be expended in the best interests of all our people. The interim report of the Alberta Petroleum and Natural Gas Conservation Board relative to its investigation into the reserves of natural gas in the Province will be tabled at the current session. Implementing the recommendations of the Commission, and in keeping with my Government's policy of safeguarding the interests and requirements of the citizens of Alberta, permission to export natural gas from the Province has been refused until such time as further proven reserves in excess of the present and future requirements of our people have been established.

During the past year, our basic industry, Agriculture, was affected adversely by unfavorable weather conditions which seriously reduced the quality of field crops.

To assist in stabilizing our agricultural industry you will be asked to appropriate substantial sums for the further extensive development of irrigation in southern Alberta. To facilitate the settlement and efficient utilization of new irrigable land within the St. Mary and Milk Rivers Development Project, my Government will provide the necessary personnel and assume the entire cost of surveys to determine the irrigable area, the location of ditches, and certain leveling of land preparatory to actual irrigation.

Measures designed to give greater protection to crops through the eradication of agricultural pests will be advanced. You will be asked to consider plans to extend existing facilities for the propagation of trees and shrubs for the beautification of farmsteads, the protection of roadways and the more effective control of soil erosion.

The construction of a third School of Agriculture, located at Fairview, will be completed in time to offer its facilities to students in northern sections of the Province for the next school term.

A vigorous program of live stock improvement is proposed for the ensuing year. Particular attention will be given to the elimination of tuberculosis and brucellosis in live stock and to the distribution of purebred sheep, swine and cattle to aid in improving the quality of live stock in accordance with export and domestic demands.

My Government will encourage and assist an extensive program of rural electrification during the ensuing year by guaranteeing borrowings of rural electrification co-operative associations under the provisions of The Co-operative Marketing Associations Guarantee Act. Short courses on the installation and use of farm electricity will be conducted and further surveys of sites for future power development projects will be conducted by the Alberta Power Commission.

The past year witnessed the most extensive highway construction program in the history of our Province and you will be asked to appropriate funds necessary to permit my Government to carry out an equally extensive program in the ensuing year, including a substantial amount of work on the Trans-Canada Highway under a joint agreement between the Province and the Federal Government. Substantial appropriations also will be recommended to provide additional bridges throughout the Province and for the erection of necessary public buildings.

Owing to the increased responsibilities devolving on the Department of Public Works, you will be asked to approve legislation to divide the present Department into a Department of Public Works, responsible for the construction and maintenance of public buildings, and a Department of Highways and Transportation, responsible for the construction and maintenance of highways, roads and bridges.

In the field of Public Health, my Government proposes to extend the financial aid accorded Municipalities in providing hospitalization for their resident ratepayers to include other residents. All Municipalities providing hospitalization for their residents whether ratepayers or non-ratepayers at a cost not exceeding \$1.00 per patient per day for public ward service will qualify for this additional assistance.

Legislation also will be introduced providing for the establishment, administration and services of Rural Health Units. You will be asked to approve the payment of Provincial grants to Health Units on the basis of 60% of the total budget of the

Health Unit. Authority to provide grants to cities with a population of 50,000 or more to aid in the provision of Public Health services also will be requested.

In the field of Public Welfare, you will be asked to approve legislation empowering my Government to enter into an agreement with the Government of Canada providing for the payment of pensions to persons in the age group of 65 to 69 years in the event that the necessary Federal legislation is passed to make possible the implementation of this proposal.

Endeavours to increase the services to single, homeless persons in the hostels operated by my Government are proceeding satisfactorily. In addition to the regular medical services, full time nursing services have been made available at the Ogden Hostel in Calgary and during the ensuing year a number of modern homes will be erected at the McKinnon Welfare Depot to provide for the needs of transient indigent families.

In matters pertaining to Education, you will be asked to study and approve a new School Act, consolidating the former Act and embodying in orderly sequence the amendments made by the Legislature over past years. You will be asked to approve increased appropriations for school grants and an amendment designed to broaden the terms of The School Borrowing Assistance Act also will be submitted for your consideration.

You will be asked by my Government to give particular attention at this session to measures designed to provide increased revenues to Municipal Governments, including Improvement Districts and the Special Areas. To this end a new Municipal Assistance Act, providing for unconditional annual grants to all Municipalities together with provision for the easement of Municipal taxation, will be submitted for your consideration. Provision will be made for increased road construction grants under a formula, which will reduce from 40% to 25% the amount which Municipalities are required to provide to qualify for this form of Provincial assistance.

Substantial appropriations will be requested to permit the operation of The Self Liquidating Projects Act to be continued for another year.

Further legislation will be submitted for your consideration which, if approved, will enable citizens of the Province to purchase Provincial Annuities on attractive and advantageous terms. These annuities will be subsidized to an extent sufficient to encourage and reward the efforts of those who strive to provide for their own security and welfare upon reaching the age of retirement and the funds invested by citizens of the Province in the purchase of Provincial annuities will be made available for Municipal financing on terms advantageous to Municipalities.

As indicated by my Government at the last session of this Legislature, a new City Act designed to bring about uniformity of law and procedure throughout the cities of the Province will be submitted for your consideration.

During the past year excellent progress has been made in the field of industrial development. My Government will continue to give active encouragement and assistance in the establishment of new industries which will utilize our primary products and contribute to the stabilization of our Provincial economy.

Legislation will be submitted for your consideration with a view to eliminating as far as possible annual business licenses and license fees and substituting therefor a system of permanent business registrations.

The Tourist Industry, which has reflected substantial growth during the past year will be further encouraged by an active promotional program employing the most effective means to publicize Alberta's many tourist attractions.

Provincial Treasury Branches have experienced another successful year and provision will be made for the continued improvement and expansion of this valuable public service.

The report of the investigation conducted by S. M. Blair into the economic feasibility of developing the bituminous sands of Northern Alberta will be tabled and legislation necessary to further this important project will be presented for your approval.

The Public Accounts for the last fiscal year and the Estimates of expenditure for the ensuing year will be submitted for your careful consideration.

I leave you now to the business of this session with full confidence that you will discharge faithfully your duties and responsibilities in the best interests of all our people. I pray that Divine Providence will guide and bless your deliberations.

Whereas the Canadian Government sold wheat for domestic market at a very low price during a portion of the five year pool, and

Whereas the British Wheat Agreement of 1945-49 between the Government of Canada and Great Britain supplied wheat to the British people at prices below those prevailing on the general world market, and

Whereas the Canadian Government sold wheat for domestic market at a very low price during a portion of the five year pool, and

Whereas the British Wheat Agreement of 1945-49 between the Government of Canada and Great Britain supplied wheat to the British people at prices below those prevailing on the general world market, and

Whereas the cost of supplying Canadian wheat to the British people and the domestic market has thus far been borne entirely by the western wheat producing farmer rather than by the people of Canada as a whole,

Therefore be it resolved that this Legislative Assembly request the Government of Canada to issue a further substantial payment to western wheat producers on all wheat delivered in the crop years 1945 to 1949 inclusive in order to bring the total price to be received by the farmers more in line with the existing world wheat prices during the 1945-1949 period.

The motion was therefore declared carried.

Moved by Mr. Prowse, seconded by Mr. H. J. MacDonald:

Whereas government spokesmen have indicated that they propose to permit the export of natural gas when sufficient additional reserves are proven, and

Whereas if and when export is permitted it is probable that some of it will be used to supply markets in the United States, and this gas may be used as a raw material in petrochemical industries in the United States, and

Whereas American tariff barriers might prevent similar products produced or produceable in Alberta from competing on an equal basis in American markets,

Therefore be it resolved that the government of Alberta press the government of Canada to demand, as a condition of permitting the export of natural gas to the United States, that the government of the United States agree to permit free entry into the United States markets of any product in the manufacture of which natural gas is used as a raw material, where a similar product is being manufactured in the United States using natural gas from Canada.

Moved by Mr. Kovach, seconded by Mr. Willmore:

Whereas the announcement by the railways that the freight rates on Alberta coal to Ontario will be increased on April 1st, 1951, with the ultimate purpose of re-establishing the so-called normal freight rates on coal published by the railways in 1923 has caused consternation in the Alberta coal industry; and

Whereas the movement of Alberta coal to outside markets now depends upon the payment of a federal subvention, and the ruinous consequences which would result from the re-establishment of the so-called normal freight rates on coal from Alberta to Ontario clearly emphasizes the necessity for the establishment without delay of a national coal policy with a view to making Canadian markets more accessible to Canadian producers; and

Whereas it is vital to national security that the Alberta coal industry not only be kept in a healthy condition but be permitted to expand so as to meet any and all demands of the Defence Preparedness program;

Therefore be it resolved, that this Legislature urge upon the Government of Canada that it take steps to prevent the re-establishment in whole or in part of the so-called normal freight rates on Alberta coal to Ontario.

A debate followed.

Mr. Roper moved as an amendment, seconded by Mr. Liesemer.
